

## Attention Trainees

Are you interested in the how's and why's of cancer, metabolic, heart, and neurodegenerative diseases?

Then you should studyAGING!

We can help you achieve your goals!

Scan here to learn how to join!

## What we offer!

Look inside for details!

### Financial Support

- Trainee awards
- Travel awards
- Diversity travel awards

### Opportunities

- Data presentations
- Publish your research

### Career Development Workshops

- Networking
- Mentorship
- Grant writing

Undergraduates

Postbaccalaureate

Graduates

Postdoctorates

## Join a Committee!

### Social media

The social media committee will create and manage AGE Trainee chapter accounts on social media (Twitter, Facebook, etc...).

### Website and newsletter

The website and newsletter committee will work with the AGE main chapter webmaster to grow a trainee page and populate it with content.

**Arts and promotional materials** The arts and promotional materials committee will develop aging and geroscience related images and solicit the greater AGE membership for age and geroscience related art.

### Grants, opportunities, and meetings

The grants, opportunities, and meetings committee will compile information for AGE trainees about new grants, courses, workshops, and meetings with aging and geroscience focuses.

### Diversity, equity, inclusion, and outreach

The diversity, equity, inclusion, and outreach committee will develop best practices for our society regarding how to be maximally inclusive of all and promote social awareness of issues related to systematic biases.

## Trainee Awards!

- **Glenn Award**

Awarded to a post-doctoral candidate who has made special contributions to biomedical aging research. This award was established in 1985 to honor Mr. Paul F. Glenn for his long-term active support of biomedical aging research through the Glenn Foundation for Medical Research.

- **Nicolai Award**

Through the generosity of the Paul F. Glenn Foundation, a prize was established in 1982 in the name of Walter Nicolai, a long-time board member of AGE, for meritorious research by a graduate or medical student in the area of biomedical gerontology.

- **Poster Awards**

Those presenting posters at our annual meeting are eligible for a "best poster" award.

- **Travel Awards**

Those submitting abstracts for presentation (oral or by poster) will be considered for travel awards.

## Career Development Workshops

Round-table discussions include representatives from NIH and other grant-providers, as well as faculty members from various institutions. Less traditional career paths are also often discussed.

## Presentation / Publication Opportunities

Present your research as a poster, a selected talk, or a short "data blitz" presentation. Review articles written by trainees, as well as original articles, are welcomed by our high impact journal, GeroScience. (See mentoring!)

## Networking

**Meet and socialize with the foremost experts in the biology of aging!**

Network with many of the world's most renowned geroscientists and biogerontologists, and peers that will become the next legends in aging research!

## Mentoring

Our senior advocates (a group of scientists further along in their careers who advocate for trainees) offer career advice as well as pre-submission paper and grant reviews.

**Learn from experts and peers about the newest exciting developments in geroscience research!**

## Financial Support for Diversity and Inclusion

If you are a member of a group that is underrepresented in science, you may be eligible for travel awards via our partnership with FASEB (AGE participates in the **FASEB MARC** program.)

From their Facebook page: "The primary goal of the FASEB MARC Program is to encourage aspiring research scientists from underrepresented groups to enter careers in research in the biomedical sciences. The program will focus on increasing participation by African Americans, Hispanics, Latinos and Native Americans, but the Program is not limited to those four groups and provisions are made to include others as appropriate." To learn more about eligibility requirements and available aid, please contact us!

**Save the Date!**  
**AGE 2020 - 49th Annual Meeting**

Held in conjunction with the  
**Nathan Shock Centers Annual Meeting**  
June 17-18

Epigenetics • Chromatin • Lipids • Systems Biology • Longevity Factors
